

Selling Diamonds - A Style of Art-by Flubba

Welcome SMMO community!

Are you interested in selling diamonds? Have you been dreaming of being surrounded by wealth and riches? Is your goal to fund each and every one of Mike's trips to the Bahamas?

If you answered yes, or no, to any of these questions, then you've come to the right place. Sit back, relax, take a sip of your coffee or tea, and dive into my world, of selling diamonds.

Hello there , do you want to buy diamonds for yourself? Sell Diamonds on the diamond market? Or maybe you're looking to sell diamonds to your fellow hole dwellers, if so, I will teach all of the rights and wrongs when it comes to selling or buying diamonds.

The number one rule to remember and live by, is ALWAYS buy diamonds from the webapp. 2 reasons, one, diamonds are always cheaper on the webapp, the second reason, and probably most important, is that you can purchase a custom amount of diamonds, with a minimum of 25 being required when doing so.

Now, if you're buying diamonds for yourself, it's simple and you're probably already aware of how it works. Simply make your way to the diamond store, and purchase your diamonds.

Let's talk about the diamond market. We will first go over how to sell diamonds on the market through the mobile app, and webapp as there are slight differences that may confuse someone doing it for the first time. First thing to note, is that you CANNOT sell diamonds that you already own, all diamonds sold are freshly bought and for the sole purpose of being sold to other players. On the mobile app, make your way to Town > Diamond Market > Sell Diamonds located at the top of the screen will take you to the diamond purchasing page, you simply purchase the amount of diamonds you wish to sell, it will then redirect you to the screen for setting your price. The price your setting is how much TOTAL you're selling the diamonds for, so figure out how much per diamond you wish to sell them for, i.e, 1.5 million gold per diamond, which will come out to 1.5 billion gold if you're selling 1000 diamonds. You input 1.5 billion into the field, and it will show you how much per diamond that comes out to, based on the total price. Simple.

Now using the webapp, things get only slightly more complicated, as after purchasing your diamonds to sell on the diamond market, it does not immediately redirect you to the screen for setting the price. So, once you purchase the diamonds for selling, don't freak out, simply make your way back to the Diamond Market, and you will see your pending diamonds, click it, and proceed with setting your price. As a DISCLAIMER, I have been told and this has happened to myself a few times, that if you purchase diamonds to sell through the diamond market, sometimes it credits the diamonds to your account instead of having them on the diamond market for selling, if you notice this happen, simply email Galahad support and you will be helped.

Okay, diamond market is through, now let's talk about selling diamonds to another player. Selling diamonds to another player, is very similar to buying them for yourself. What you'll do is go to a player's profile, and select Gift Diamonds, now again, you should be doing this through the webapp, on the player's profile there will be a down arrow where you can select Gift

Selling Diamonds - A Style of Art-by [\[👤\] Flubbah](#)

Diamonds, then proceed to purchase the diamonds, and they will be credited to the players account. Once that happens you and the player will do a trade for the gold, of course this can be done in any order, whatever makes you and the player purchasing the diamonds from you the most comfortable and safe.

And that's it....he says 3600 characters later.

If you ever ever ever have any questions about selling diamonds, feel free to PM me in game at anytime. I love to help the community in any way I can 😊

Until next time, stay wonderful 👍
